JPT Scare Band - (1973 - 75) - Sleeping Sickness

This post now is for few, therefore this band is what she is known as a "Jam Band", that is, they does not present musical structures sedimented... only wide tickets ad-lib (1 music of the record only has vocal). Therefore you must be sufficiently tolerant the instrumental punhetagem pra to tan the JPT Scare Band.

Of any form the estória of this band is well interesting. They had never been famous nor nothing, were alone a group of friends who tanned to order a sound in the bilge of the house of them and fortunately they had a ribbon recorder, however she is that they were VERY bõns in ordering a sound... hehe These ribbons had been kept in a box catching mildew per 3 decades, until by blow of the destination, were discovered by a German stamp that delayed decided to launch the benditas jams. Then if you tan a Hard Rock of the weighed one with a well bluezeira footprint, the JPT Scare Band you are the sound that you must listen... you imagine all the garageiras pearls that if had lost per the years, the the least the JPT in you did not escape them, the fuck later you are if to exempt of "gostinho of I want more".
